HMI Screen Editor & Logic Programming Software

GP-Pro EX ⁺

Create Your HMI Application in Minutes

GP-Pro EX is the easy-to-use development software for Pro-face HMI and IPC units. With a wide array of application development tools, expanded diagnostic features and simulation capabilities, GP-Pro EX is capable of handling the most demanding HMI applications.

Set up communications

- Choose and set up PLC and third-party devices effortlessly
- System settings are logically arranged and easy to find

Design application/screens

- Drag-and-drop addressing, parts and colors
- Efficient features to reduce development time
- Create consistent look and feel using the user-defined templates

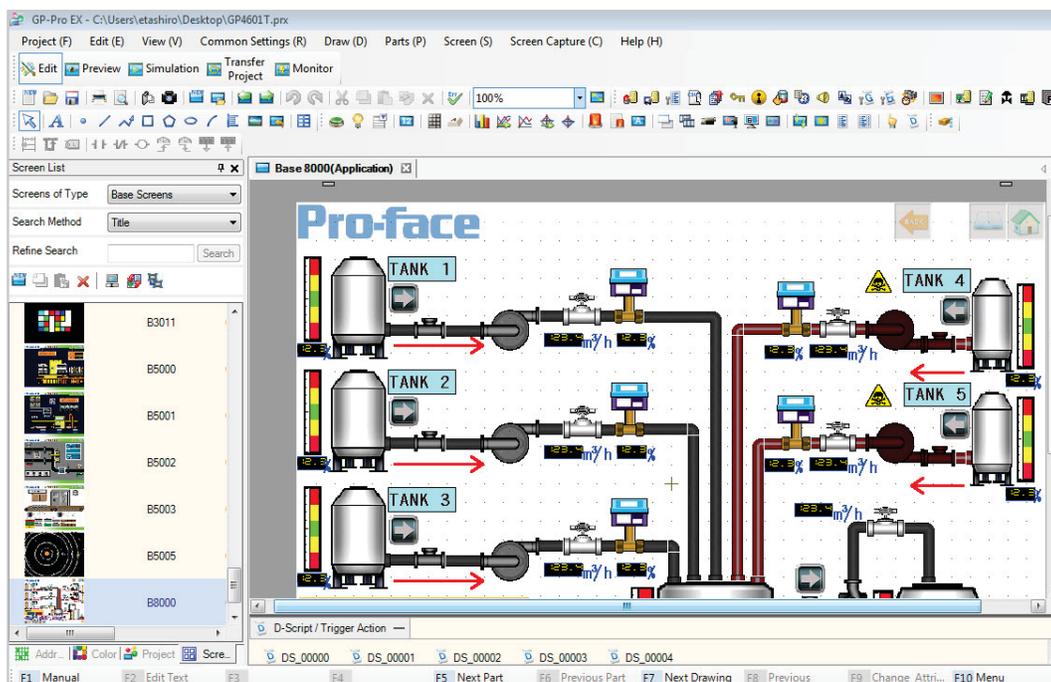

Simulate and test

- Verify before you travel
- Debug your application without hardware
- Test without downloading

Download/transfer

- Tamper-proof HMI application – password-protected project source

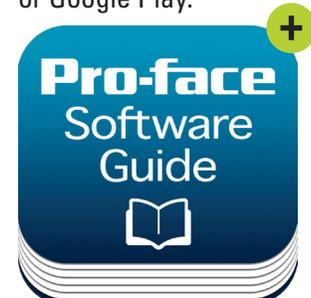

One development software for both dedicated and open windows-based operator interfaces.

Data management software

Pro-Server EX+

Enterprise-wide data collecting, sharing, connectivity solution

- Applications
- Collect and Manage Data
- Connectivity Support

Control Room
Plant Floor

Pro-face open- platform HMI

Application software for sharing user-defined factory-floor data throughout the corporate enterprise

+ GP-Viewer

-  Monitor and Control Multiple Operator Interfaces from a Single Remote PC.

+ Camera Viewer

-  Record, Display and Playback Live Video of Industrial Operations on a Remote PC.

+ Pass Through

Programming and monitoring PLC via operator interface.

+ Remote PC Access

Harness the power of a PC from your dedicated HMI.

+ Memory Loader

Field maintenance and backup with data protection.

+ Transfer Tool

Easy machine maintenance and data log retrieval.

+ WebServer

View HMI information and alerts through a web browser.

+ Remote HMI

-  Monitor & control HMI screens from a smart phone or tablet (data input, send work instruction, etc.).

+ WinGP

-  Runtime software for GP-Pro EX created applications.

+ FTP Server

Upload and download data files to the operator interface over the internet.

Pro-face Remote HMI

Efficient

See machine information anywhere without going to the spot, saving you travel time.

Effective

Able to monitor status of multiple machines (up to 100) by one Pro-face Remote HMI.

Easy Set Up

GP-Pro EX software facilitates easy set up and activation of Pro-face HMI.

Interactive

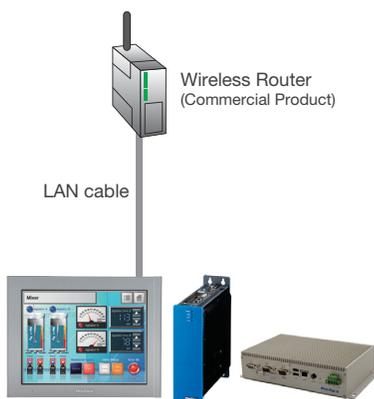

Besides monitoring, you can control the machine from your tablet or smart phone (data input, send work instruction, etc.).

Quick steps to use Pro-face Remote HMI

STEP1

Hardware Preparation

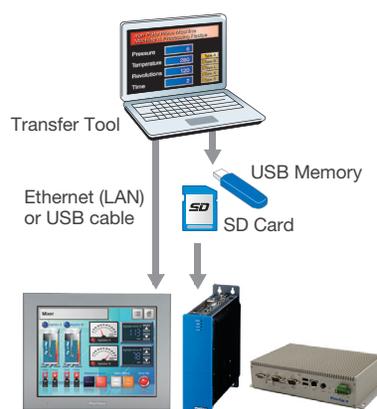

Prepare Wireless Router and connect to HMI.

STEP2

Transfer Project File

Adjust application in GP-Pro EX and transfer it to HMI.

STEP3

Install Remote HMI on a tablet or smartphone

Download and install Pro-face Remote HMI on a tablet or smartphone. Search HMI and connect to monitor the HMI screen.

*Remote HMI Server license is required separately to monitor IPC and PC.

Monitor and Control Pro-face HMI screen on a smart phone or a tablet.

Download Pro-face Remote HMI today!

Screen Shortcut

Images or text of machines to monitor can be registered as shortcuts to easily jump from one HMI to another among multiple applications, for various working environments.

Alarm Monitor Function

Indicating the status of each HMI in the overview reduces the time for identifying the faulty system and further reduces the downtime and associated costs. Besides the status bar for each HMI, any alarm can also trigger an alarm sound.

Touch Exclusive Control

Setting the monopolize touch function prevents unexpected operational misuses caused by redundant operation. Operation is re-enabled only 30 seconds after Pro-face Remote HMI or the HMI unit on the equipment has been operated.

Synchronized or Asynchronized

Switch communication modes to monitor status. Synchronous mode allows you to monitor screens that are the same as the operators' screens. Asynchronous mode allows you to monitor different screens during regular operation without stopping on-site operation.

GP4000 Standard

Description

Best in Class Connectivity, Powerful HMI Functionality and Full Compatibility with legacy Pro-face GP-Pro EX and GP3000 products. GP4000 HMI drivers allow you to “talk to” your preferred PLC, vision system, motion controller, temperature controller, inverter, bar code reader, and actuator.

Easy to Use: Operators can easily monitor conditions and the operating environment in real time using realistic 3D buttons, lamps, and gauges.

Saves Energy: Reduces on-site power consumption in a variety of ways including an on-board LED backlight in all models, and a dimmer setting used to decrease and eventually stand-by the display after being idle for a set period of time.

Quick On-site Recovery: Simply touch the alarm message to check the relevant data in chronological sequence.

Remote Monitoring: GP-Viewer EX software provides various remote monitoring functions, such as checking the screen of the GP located on a production site from a remote office.

Features

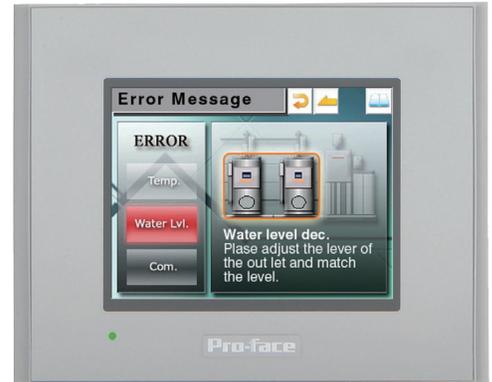

- 65,536 Colors, Clear, Bright, High-Resolution TFT Display
- Energy Efficient LED Display
- No Grid Analog Touch Panel for Improved Visibility and Precise Part Placement
- Supports Up to Two Protocol Drivers Simultaneously
- High Speed Application Transfer, 10 Times Faster than Conventional Operator Interfaces
- 10/100 Base-T Ethernet, USB, and Serial Communication Interfaces
- High-Definition Part Images and Multi-Language Support
- Custom Overlays available
- Remote HMI compatibility (tablet/phone)

GP4000 Rear Mount

Description

The GP4000 Series Rear-Mount model is an HMI that can be mounted from the rear of an equipment control panel. Conventional programmable displays are typically designed to be mounted from the front, and have a bezel that projects past the front of the equipment control panel.

By offering a rear-mount model that can be mounted from the rear of an equipment control panel to meet the increasing need for design-conscious equipment in the industrial world, Pro-face is now able to provide a mounting method that matches industry needs in terms of equipment appearance and overall control panel design.

Using a rear-mount model also makes it possible to keep the control panel and display area flat. This has the benefit of preventing the accumulation of dust and mold, and even allows the display to be used in medical equipment and other devices used in environments where hygiene is important.

Features

- Equipment control panel and display area can be kept flat
- Available in four sizes: 12.1", 10.4", 7.5", and 5.7"
- Compliant with a variety of international standards
- Supports GP-Pro EX, screen editing and logic program software for the existing GP4000 series

GP4000 Modular

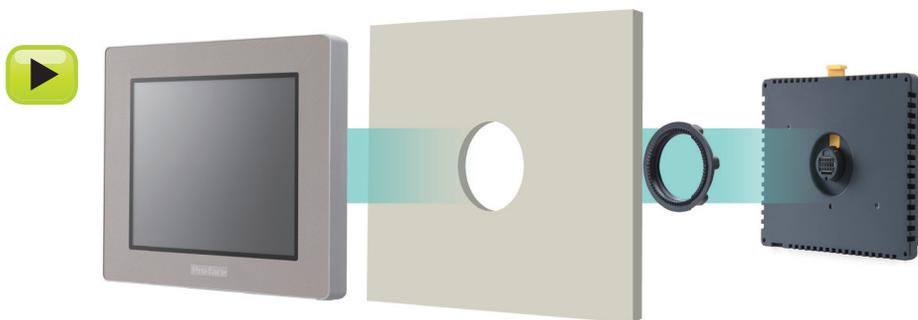

Description

This dedicated operator interface touch screen is ideal for OEMs and high graphical detail applications. It is part of a latest line of Pro-face brand operator interfaces. The bright, crisp, and clear QVGA display of this model is complemented with a large viewing area, and no grid analog for improved visibility and precise part placement.

A host of features include Ethernet, USB, and RS232, 422, 485 serial ports. The extensive network connectivity allows support of up to two simultaneous protocols making this a highly versatile operator interface.

Features

- 65k Color, Clear, Bright, High-Resolution TFT Display
- Energy Efficient LED Display
- No Grid Analog Touch Panel for Improved Visibility and Precise Part Placement
- Supports different types of Protocol Drivers (communicates to two selected drivers)
- Separate front & rear module for quick installation in 22mm hole
- 10/100 Base-T Ethernet, and USB

Modular Type For Easy Mounting

GP4100 Compact

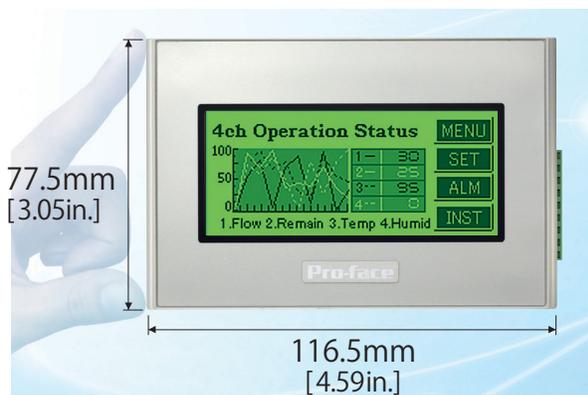

Description

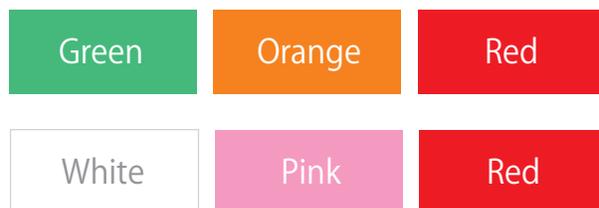

The Pro-face AGP4100 Series compact operator interface offers a crisp, clear and bright, 200 x 80 pixel monochrome LCD Display, with Analog Touch Panel for improved visibility and precise part placement. It comes equipped with energy efficient, maintenance free Green/Orange/Red or White/Pink/Red LED backlights.

Features

- Crisp, clear and bright, 200 x 80 resolution Monochrome LCD Display
- No Grid Analog Touch Panel for improved visibility and precise part placement
- Touch Panel operation within a text panel replacement form factor
- Energy efficient, maintenance free LED backlight

Select between two patterns of 3-color switchable backlights

AGP3000 Standard

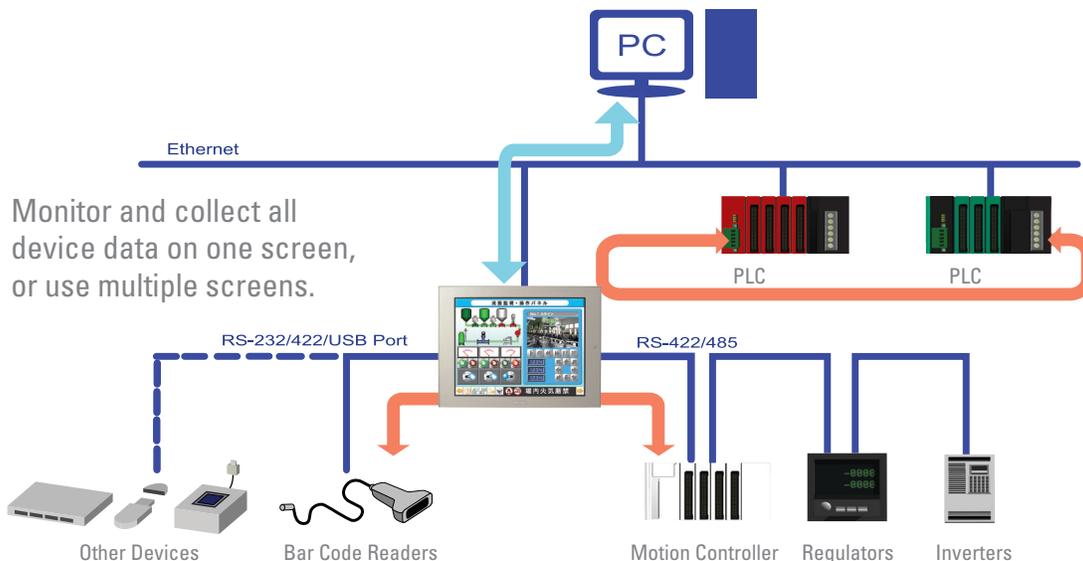

Description

The Pro-face AGP3000 operator interface offers multiple models for flexibility, control, and connectivity. The standard product line offers extensive, built-in, time-saving features that help customers develop fast, consistent, standardized graphical interfaces. Add single platform data management and control with GP-Pro Ex or Pro-Server EX software to complete the winning combination.

Features

- Multi-Protocol: Simultaneous communication with 3rd party equipment.
- Multi-Lingual: Operator can see screen in language of choice.
- Bar-code Reader Support: Parts tracking made simple.
- Multi-Action Switches: Execute multiple actions with "ON" switch.

AGP3000 Multi-Media

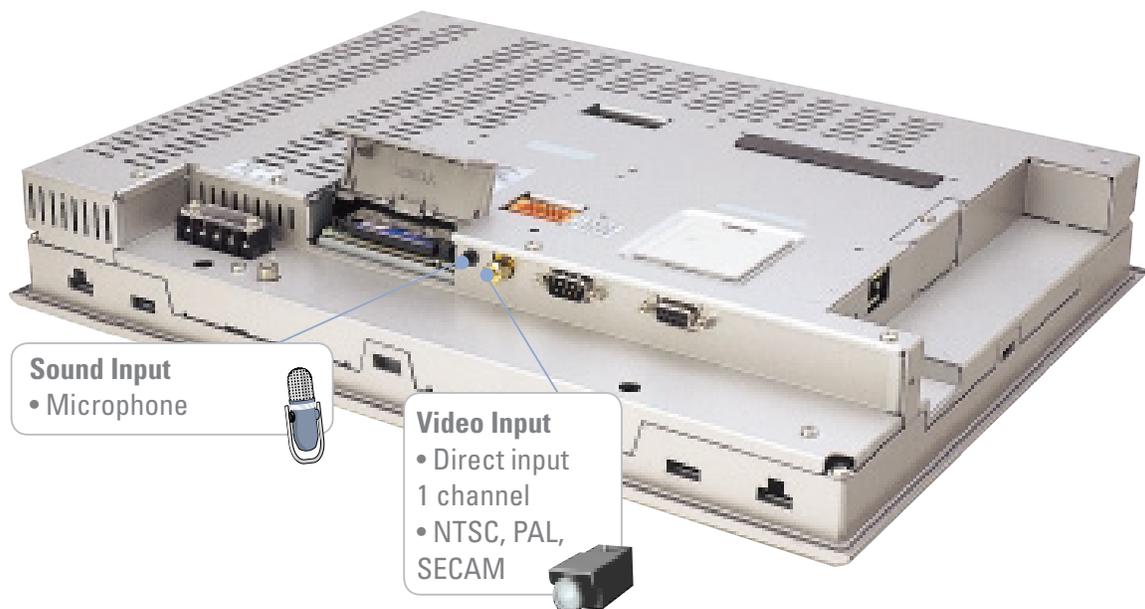

Description

The Pro-face AGP3000 operator interface offers multiple models for flexibility, control, and connectivity. The Multi-Media product line offers the same extensive, built-in, time-saving features to help customers develop fast, consistent, standardized graphical interfaces as our Standard product line, plus video and sound inputs. Add single platform data management and control with GP-Pro Ex or Pro-Server EX software to complete the winning combination.

Features

- No Grid Analog Touch Panel for Improved Visibility and Precise Part Placement
- Supports Up to Four Protocol Drivers Simultaneously
- 10 Times Faster Application Transfer than Conventional HMIs
- 100 Base-T Ethernet, USB, Serial and CompactFlash Communication Interfaces
- Direct Video & Audio Input Ports, plus Audio Output

AGP3000H Hand Held

Description

The Pro-face AGP3000H hand held operator interface offers multiple models to meet the needs of your application. The standard product line offers extensive, built-in, time-saving features that help customers develop fast, consistent, standardized graphical interfaces. Add single platform data management and control with GP-Pro Ex and Pro-Server EX software to complete the winning combination.

Features

- Tethered HMIs with full graphic touch screen
- Built-in Safety Features: Emergency Stop, 3-Position Enable Switch, and Key Switch
- Ideal for use with portable machine diagnostic or maintenance carts
- Connect directly to PLC or use easy disconnect access points

LT4000 Modular

Description

The LT4000M provides both HMI, digital and analog control in a single unit.

A unique modular style allows the display and rear module to be mounted directly (to each other) or separately (connected by a 3 or 5m cable).

Features

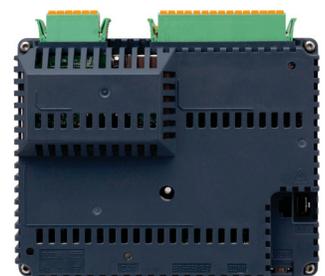

- Compact all-in-one unit for easy installation in small spaces
- 22mm hole mounting (similar to a pushbutton) saves time
- Flexible installation choices for integrated or separated display and rear module

Mount the unit as one (with 22mm hole mounting), or separate with the processor on a DIN rail with the available separation cable.

Easy wiring with removable spring I/O connector

LT3000 Control

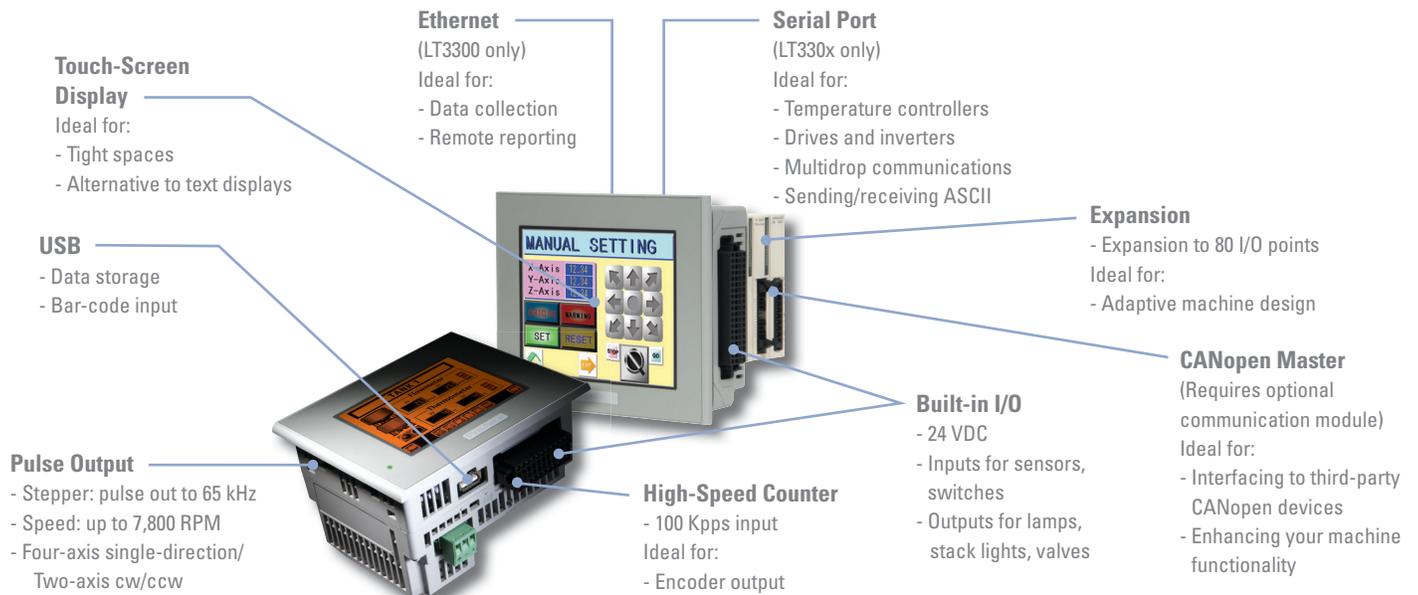

Description

The LT3000 operator interface family combines built-in PLC functionality integrated with an HMI. It is an all-in-one hardware and software HMI Control Solution. Lowering overall system costs and panel space. Use up to 2 or 3 I/O modules, depending on the hardware model, connected directly to the back of the LT3000 as local I/O . The optional CANopen Master module can be used if remote I/O, Sensor, or Motion connections are required.

Features

- One Software Application for HMI & Control
- Space-saving HMI plus Control in One Unit
- Build Flexibility into your Machines
- Eliminate PLC/custom controls
- Cut remote maintenance costs

AGP3000 Control with CANopen

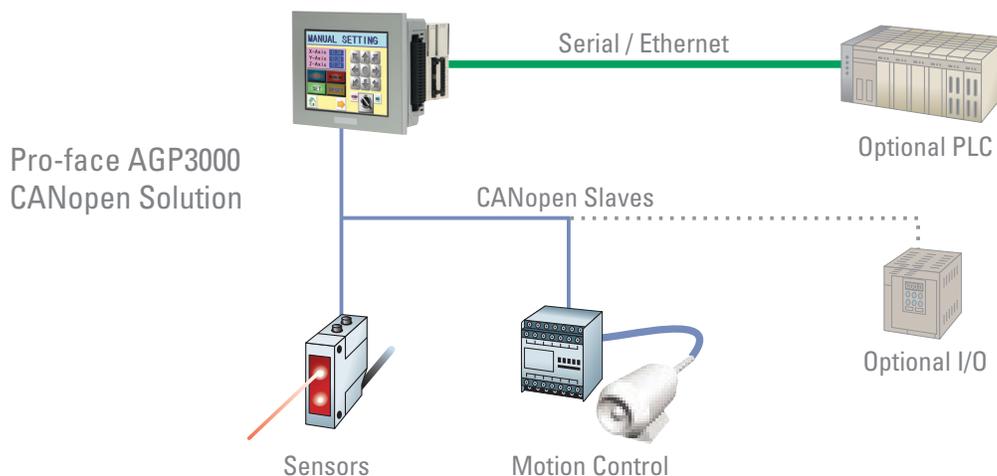

Description

The AGP3000 with built in CANopen Master interface is part of the latest line of Pro-face brand operator interfaces. The bright, crisp, and clear QVGA display of this model provides a wide angle viewing area, with a high resolution no-grid analog resistive touch screen for a higher level of screen clarity and precise part placement.

For great performance, compact size, flexibility and network connectivity requirements, the AGP3000 with built in CANopen Master is a great choice!

Features

- CANopen Master interface connects up to 63 CANopen slave devices (I/O, Sensors, Motion) of you choice
- 65, 536 Colors TFT, Clear, Bright, High-Resolution TFT Display
- 64-bit RISC 133Mhz CPU for Ultra-Fast Screen Refresh and Data Sampling
- 10/100 Base-T Ethernet, USB Serial (MPI) and CompactFlash Communications

EZ Series USB Solutions

Description

The EZ Series was developed in response to the need to easily improve the functionality of operating stations at production sites.

EZ Fingerprint Recognition Unit can improve security by providing fingerprint authentication, improving security efficiency.

EZ Illuminated Switch can accommodate the need for hardware switches and light indicators. Displayable indicator colors and patterns can be specified via the software.

EZ Numpad is an alphanumeric keypad that features the same 22-millimeter holes used to install hardware switches and lamps used on production work sites.

EZ Tower Light makes your status system easier to understand by leveraging the multi-color LEDs which allows the flexibility to control 4 colors and 2 flash rates per unit.

Features

- Easy to connect - USB Connection
- Easy to install - 22mm Hole Mounting
- Easy to setup - No need for special programming, easy setup by GP-Pro EX
- Multi-color LED's allow colors and functions to be changed per pre-set status
- Switch between input and function keys

Think Outside the HMI

Fingerprint Recognition Unit

Fingerprint recognition unit easily connected with HMI via USB

General Specifications

Rated Input Voltage	24 Vdc
Input Voltage Limits	20 to 30 Vdc
Power Consumption	1.6W max
Surrounding Air Temperature	0 to 50° C (32 to 122° F)
Storage Temperature	-25 to 70° C (-13 to 158° F)
Environmental Ratings	IP65 front face / IP20 back
Supported Software	GP-Pro EX Ver. 3.1 or later
Certifications	CE, CSA, UL, RoHS

Product Specifications

Part Number to Order	PFXZCCEUSS1
External Dimensions	W 69.3 x H 54 x D 78.5mm (W 2.73 x H 2.13 x D 3.09in.)
Weight	140g [0.31 lb]
Memory Capacity	100 users (2 fingerprints for one user)
Security Level Setting	15 levels
Connection	Connect via USB cable
USB Cable Length	USB cable: 1.0m (3.28 ft.); Power cable: 2.0m (6.56ft.)
Connectable HMI	GP4000, GP4000M, WinGP, LT4000M, SP5000

Illuminated Switch

A unit of 5 illuminated switches with multiple color LED easily connected with HMI via USB

General Specifications

Rated Input Voltage	5 Vdc (powered from USB bus)
Input Voltage Limits	4.75 to 5.25 Vdc
Power Consumption	2.0W max
Surrounding Air Temperature	0 to 55° C (32 to 131° F)
Storage Temperature	-20 to 60° C (-4 to 140° F)
Environmental Ratings	IP65 front face / IP20 back
Supported Software	GP-Pro EX Ver. 3.1 or later
Certifications	CE, CSA, UL, RoHS

Product Specifications

Part Number to Order	PFXZCCEUSG1
External Dimension	W 122 x H54 x D 28mm (W 4.80 x H 2.13 x D 1.10in)
Weight	110g (0.24lb) or less
Number of Switches	5 illuminated switches
Durability of Switches	1 million times or more for each switch
LED Colors	Red, Green, Yellow, Blue, White, Orange
Function Key Lables	Printable and replaceable insert labels
USB Cable Length	1m (removable)
Connection	USB I/F: Type B (socket), USB 2.0 Full Speed
Connectable HMI	GP4000, GP4000M, WinGP, LT4000M, SP5000

Type A

*When using the unit with GP4000M, it is necessary to use self power USB HUB.

USB 2.0*

Numpad

Programmable alphanumeric keypad easily connected with HMI via USB

General Specifications

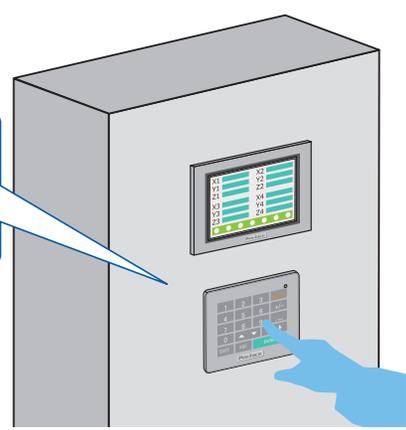

Rated Input Voltage	5 Vdc (powered from USB bus)
Input Voltage Limits	4.75 to 5.25 Vdc
Power Consumption	.75 W or less
Surrounding Air Temperature	0 to 55° C (32 to 131° F)
Storage Temperature	-20 to 60° C (-4 to 140° F)
Environmental Ratings	IP65 UL50E TYPE 4X (Indoor Use Only)
Supported Software	GP-Pro EX Ver. 3.6 or later
Certifications	CE, CSA, UL, C-tick, KC, Gost-R, RoHS

Product Specifications

Part Number to Order	PFXZCCEUKB1
External Dimension	W 97.6 x H 80.0 x D 31.5 mm (W 3.84 x H 3.15 x D 1.24 in.)
Weight	150 g (0.33 lb) or less
Function Key Label	Printable and replaceable insert labels
USB Cable Length	1m (Removable) *Max 5m with extension cable
Connection	Type miniB (socket), USB 2.0 Full Speed
Connectable HMI	GP4000, GP4000M, WinGP, LT4000M, SP5000

Compare data during input operation to reduce mistakes.

Tower Light

Tower light unit easily connected with HMI via USB

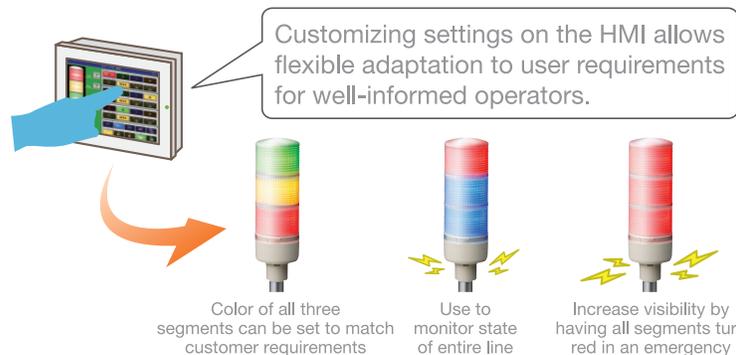

General Specifications

Rated Input Voltage	5 Vdc (powered from USB bus)
Connection	Type miniB (socket), USB 2.0 Full Speed
Power Consumption	2.0W max
Storage Temperature	-35 to 70° C (-95 to 158° F)
Ambient Operating Temp	0 to 55° C (32 to 131° F)
Environmental Ratings	IP54
Supported Software	GP-Pro EX Ver. 3.1 or later
Certifications	UL 508, cUL, CSA22.2, CE

SP5000 Enhanced HMI

Description

Pro-face has created a new market with the new SP5000 Series interface terminal—or Smart Portal—a new category of HMI, to improve production efficiency by better leveraging the big data generated at production work sites and offices.

The new SP5000 Series interface terminal has been developed to respond to the need to obtain data and supply it where required in an appropriate format for efficiency improvements and the need safely network production work sites with offices.

Until now, networking existing production worksite facilities with an office has necessitated the introduction of large-scale systems and the upgrading of facilities. By introducing the Smart Portal to the production work site, information such as production results and machine data, and production management data required in the office can be made smart at low cost. With the release of the SP5000 Series, Pro-face hopes to create a new Smart Portal market, which it forecasts to reach the same scale as the current HMI market within the next five years.

Features

- 16-million-color TFT LCD multi-touch panel
- Modular design and screwless box module attachment for improved maintainability when repairing or replacing.
- Available in 12 configurations — 6 display module models and 2 box module models
- Supports applications that run on Windows
- Equipped with two Ethernet ports standard
- Equipped with two standard SIO ports and up to three USB ports
- By using together with Pro-face Remote HMI, it is possible to check and operate machinery from mobile devices such as smartphones and tablets
- Compliant with various international safety standards and IP65F/IP66F/IP67F for use in a broad range of situations

Premium Display – SP5000

PE4000B Node Box

Description

The PE4000B is an industrial computer that can be embedded in data loggers, low-voltage power supply systems, and other equipment on the production work site. Compared to previous embedded industrial computers developed and manufactured by Pro-face, the new product is 60% smaller by volume and 38% lighter by weight.

The PE4000B Series industrial computer is equipped with up to six serial ports and three Ethernet ports, and responds to the need for peace-of-mind when used in conjunction with a data logger for data collection. It can also be used with automatic guided vehicles (AGVs), picking carts, and similar equipment powered by 12 to 24 V batteries.

The new PE4000B Series industrial computer can be combined with Pro-face's remote application software, Pro-face Remote HMI to enable remote confirmation and operation via a tablet or similar device. By supporting remote confirmation and operation, the need for a permanent monitor for embedded industrial computers can be eliminated, allowing the operator to check and operate machinery at any time using a tablet or smartphone.

Features

- Check real time production data, and check battery or location with Pro-face mobility solutions for remote access
- Highly compact design and mountable via DIN rail or directly, allowing freedom of product placement and convenient installation
- No moving/rotating parts such as fan or HDD
- Energy efficient design with low heat emission
- Available with either a 9 to 36 VDC or 12 to 24 VDC power supply in a total of six models
- Equipped with up to six serial ports, three Ethernet ports, five USB ports, and eight digital I/O ports
- CF/CFast card compatible with embedded OS and SSD for use in environments with a lot of vibration

PS4700 (Z510) Panel PC

The PS4700 Z510 features a Atom™ Z510 processor, creating a powerful system for any production floor. Its aluminum housing adds to the PC's durability, while its multiple I/O ports lend to its flexibility. Customers have a choice of an aluminum, or stainless steel bezel to accommodate different environments. This unit also has low power consumption, along with being a diskless and fanless PC. There are also stainless steel options, which support ATEX.

FP5000 – Flat Panel Display

Description

Sharing the panel cut out dimension with the FP3000 Series, the FP5000 Series is the natural choice for upgrading your system. Automatic resolution and brightness adjustment eases upgrade and increase operation efficiency.

The FP5000 Series employs an analog resistive multi-touch touch panel that allows multi touch gestures even when wearing work gloves. Gesture operation greatly prevents unintended operation and the multi-touch panel film prevents display glass fragments from contaminating the processed goods, essential in the food and beverage industry.

In addition to cutting-edge functions such as gesture operation and a brightness sensor, the FP5000 Series provides a high level of environmental resistance with features like a maximum ambient operating temperature rating of 60°C and an IP67F protection rating that allows it to withstand washing with a high-pressure cleaner during hygienic maintenance of equipment.

Features

- Automatic resolution adjustment
- Supports operating systems from Windows XP to Windows 8.1
- 12Vdc battery operated devices and equipment
- Straight forward connectivity
- Front USB port for easy data export

Simple configuration of display and PC

- Easy installation with integrated mounting bracket and anti-drop lock
