

Remote Maintenance and Monitoring with MB Connect Line

Brian Schuster

MB Connect Line

MB CONNECT LINE

remote maintenance solutions

MB Connect Line

- Founded in 1997 by Siegfried Müller and Werner Belle
- All products are designed and developed entirely in house
- 2004 added support for broadband and the central Portal
- Technology and Security leader in the Industry

MB Connect and Security

- We are a manufacturer of hardware and software for remote maintenance systems and are focused on developing high-security products and services for our customers, such as the mbCONNECT24 remote service portal.
- We are a member of the IT Security Association of Germany (TeleTrust) and we develop our products under the defined guidelines of TeleTrust, which allows us to represent the “Security Made in Germany” label.

Security

- Furthermore, MB Connect Line is a member of the Alliance for Cybersecurity and we actively work with the Federal Office for Information Security.
- This enables our development engineers to be preemptive and to counteract security threats very quickly.
- We use open source technologies which enable us to ensure the highest possible security when using the mbCONNECT24 portal...

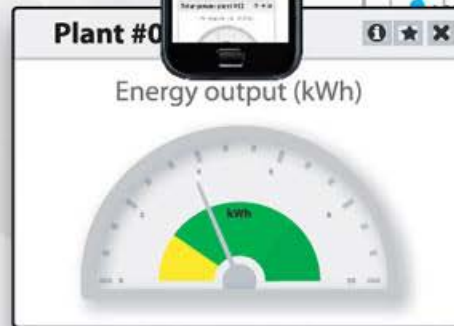

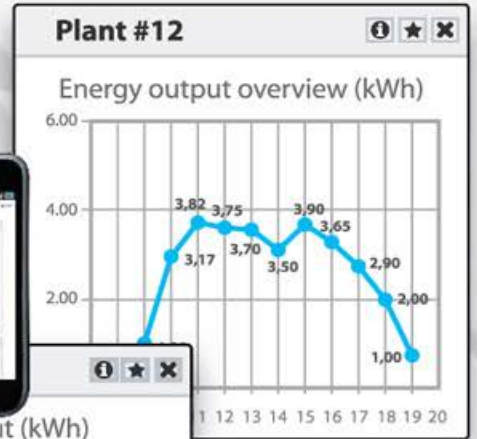

Security: Open Source

- Open source technologies give us high flexibility when it comes to integrating external hardware.
- Our remote maintenance systems work with X.509 certificates, OpenSSL and TLS-Encryption up to 2048 bit.
- Our servers are located in high-security datacenters in Europe and North America.

Technology Leader

- **Started in 1997 with point-to-point dial up modems**
- **Developing features first such as:**
- **First to have public portal, allowing access from anywhere**
- **First to offer dashboards and data collection remotely in one centrally accessible location**
- **First to offer support for mobile devices with Web2Go**

mbNET.toolbox

Web visualization
Scripting
Database connectivity

mbNET.toolbox

- Easy web visualization possible
- Compatible with mbWEB2go
- Intelligence integrated in the mbNET with the programmable Scripting language LUA
- Extended Logging functions
- Integrated Monitoring with SMS and Email functionality in case of an event
- User management for the web visualization

mbNET.toolbox Widgets

Energy output (kWh)

Solar power plant #12

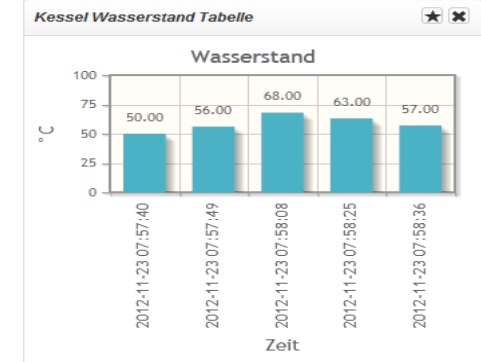

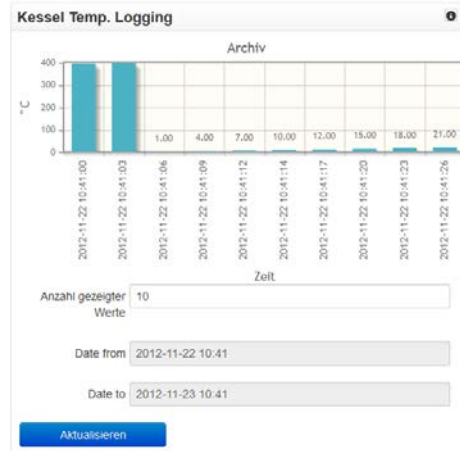

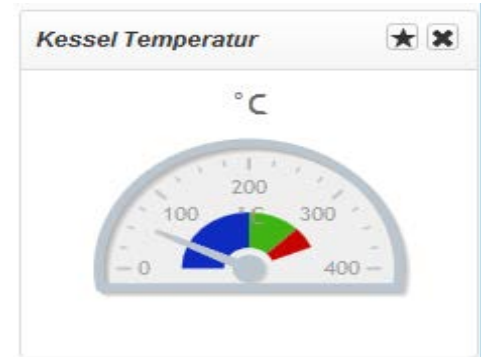

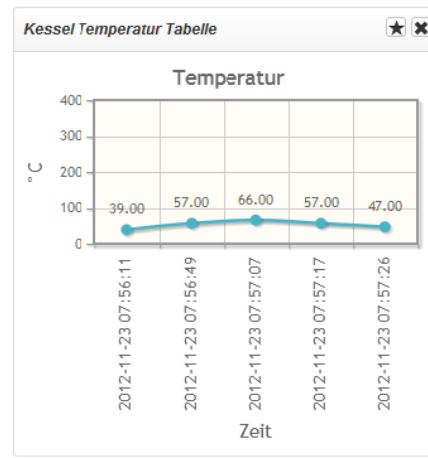

Overview

2012-09-28 08:26:05	→	0,12 kWh
2012-09-28 09:26:05	→	1,23 kWh
2012-09-28 10:26:05	→	3,17 kWh
2012-09-28 11:26:05	→	3,82 kWh
2012-09-28 12:26:05	→	3,75 kWh

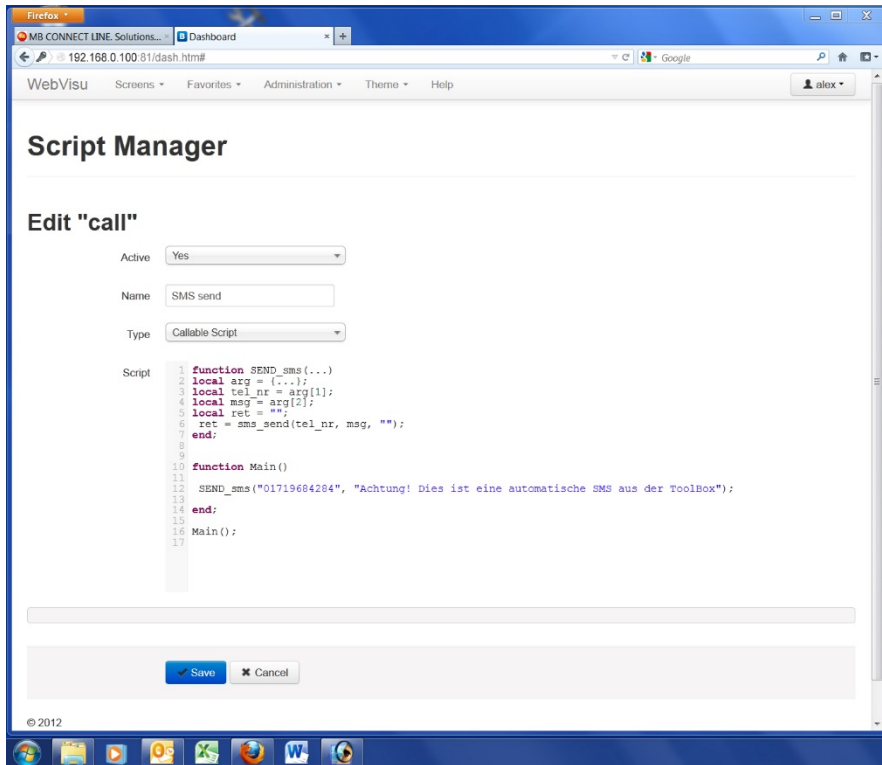

Energy output overview (kWh)

Time	Energy output (kWh)
7	0,12
8	1,23
9	3,17
10	3,82
11	3,75
12	3,70
13	3,50
14	3,90
15	3,65
16	2,90
17	2,00
18	1,00
19	0,12
20	0,12

Energy output (kWh)

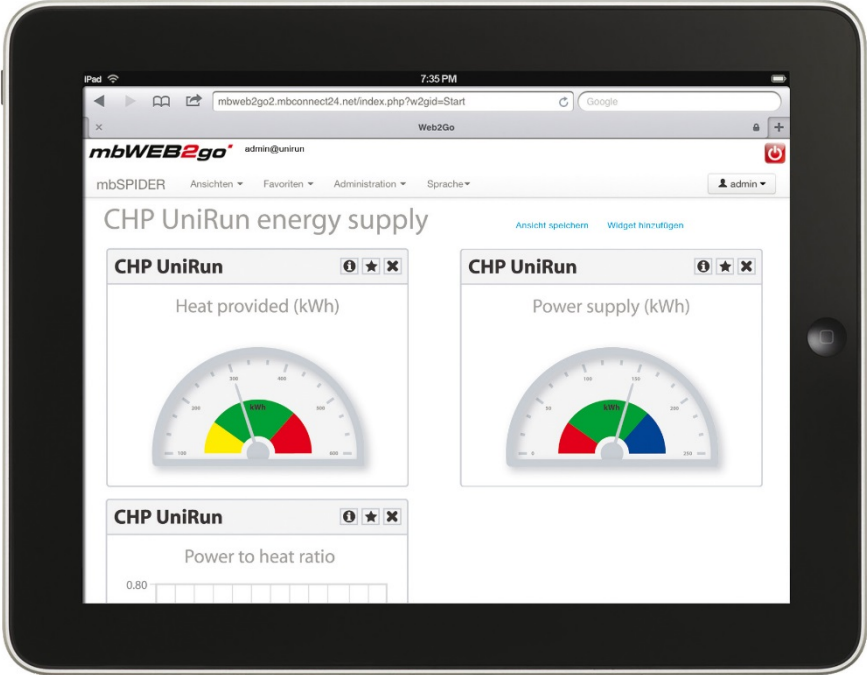

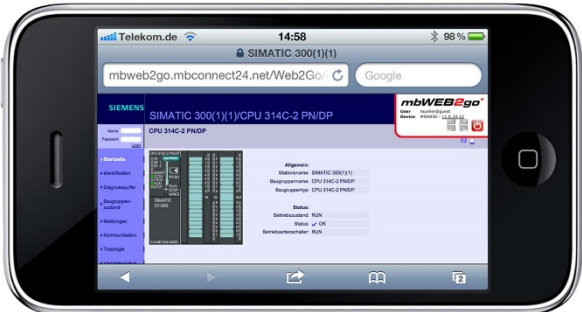

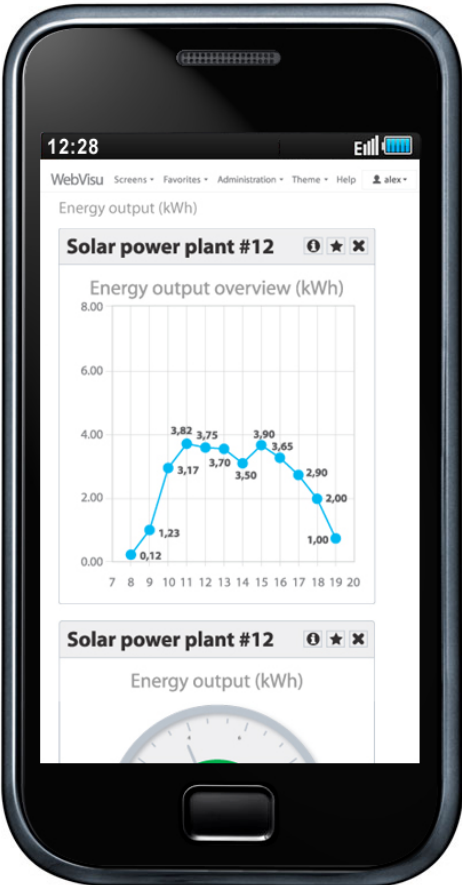

mbNET.toolbox Scripting

```
1  -- Mail Options
2  -----
3  _emailaddr = "support@mbconnectline.de";
4  _subject = "meine erste mail von der Toolbox";
5  _txt = "Alles in Ordnung! Temperatur ist : ";
6  -----
7
8  -- Verbinde zur SPS
9  handle = plc_connect("ISOTCP", "192.168.0.100", "2");
10
11 -- Lese MW10 aus
12 data = plc_read_datapoint(handle, "Flags", "", "10", "2");
13
14 -- trenne Verbindung zur SPS
15 plc_disconnect(handle);
16
17 -- schreibe Temperatur in email
18 _txt = _txt..data.." °C";
19
20 -- sende email
21 return_value = mail_send(_emailaddr, _subject, _txt, "");
22
23 log_message("LOG_INFO", "E-Mail Funktion returned:" .. return_value);
24
```

mbNET.toolbox Web2Go

- **Secure Connection via VPN-tunnel**
- **Simple and clear configuration**
- **Central management of all users, projects and devices**
- **No IT-specific knowledge necessary**
- **Data Export to PDF or CSV file**
- **Available in 3 different versions:**
 - **Public Hosted**
 - **Private Hosted**
 - **Hardware server, which is self hosted**

Server Overview

mbCONNECT24

Safe remote maintenance
via a central service portal
with convenient user
management

mymbCONNECT24

Safe remote maintenance
portal as pre-installed
complete system for your
service center

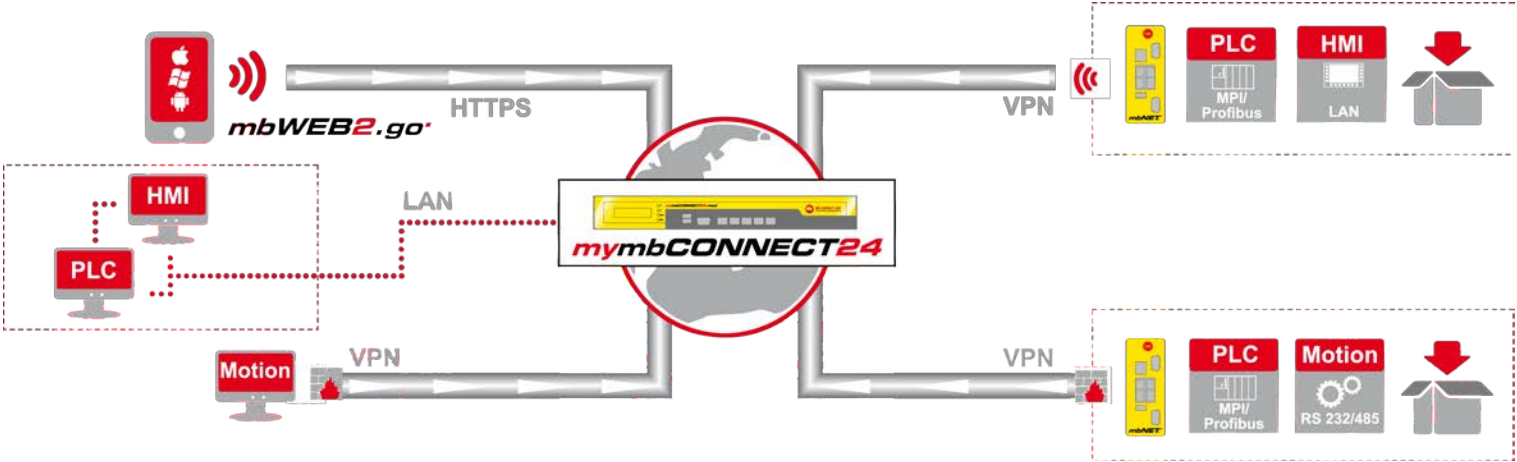

mymbCONNECT24.hosted

All the features of the
hardware Portal, fully
maintained by MB connect
line

Central Service Portal

mymbCONNECT24

Self Managed Hardware Portal

mymbCONNECT24

mymbCONNECT24 mini supports as box solution

- ✓ Unlimited users
- ✓ Up to 110 machine accesses/mbNET-units
- ✓ Up to 5 active connections at the same time
- ✓ one account

mymbCONNECT24 midi supports as box solution

- ✓ Unlimited users
- ✓ Up to 260 machine accesses/mbNET-units
- ✓ Up to 50 active connections at the same time
- ✓ Up to 5 accounts

mymbCONNECT24 maxi supported for the assembly in a 19"-rack

- ✓ Unlimited users
- ✓ Up to 1,010 machine accesses/mbNET-units
- ✓ Up to 150 active connections at the same time
- ✓ Up to 25 accounts

Hardware Portal

- **No External end-points for VPN tunnel, entirely in house solution**
- **Bandwidth allocation dependent on customer**
- **High number of available connections and devices**
- **Advanced features allowing M2M communication**
- **Peace of mind for even the most paranoid company**

Central private hosted complete solution

mymbCONNECT24.hosted

- ✓ Own private hosting in a professional server center
- ✓ Maintenance of the server made by MB connect line
- ✓ Server reachable with own IP address
- ✓ No effort for the customer but the advantage of a private server
- ✓ Various capacities of the server possible starts with 250 – 20,000 devices

mbCONNECT24 V2.0

Remote Management Portal

Central Functionality

- ✓ project based visualization, alarming and protocolling
- ✓ project based scripting
- ✓ secure IP-communication via full transparent VPN-tunnel
- ✓ user-API functionality to request actual and protocolled data
- ✓ remote access
- ✓ M2M communication, networking of equipment via the internet
- ✓ web based visualization
- ✓ multilevel license structure

webbasierte Visualisierung

Überwachen und Alarmieren

Web Based Visualization

- **Free Configurable dashboards to show individual data**
- **Support for RDP and VNC for connecting to additional devices (ex: HMI)**
- **Upload your own images**
- **Based on HTML5 and supports Windows, Android and Apple Operating Systems**
- **Access to integrated PLC webserver and other client devices**
- **Shows data points from PLC in visualization**

Portal V2 Highlights

- **Comprehensive, centralized solution for industrial VPN infrastructure.**
- **Communication takes place via TLS encrypted connections, allowing OpenVPN to ensure the authenticity, integrity and confidentiality of the data**
- **Service personal, as well as machines and equipment work exclusively with outgoing connection**
- **No problems with IP subnets and address ranges**

mbCONNECT24 V2.0

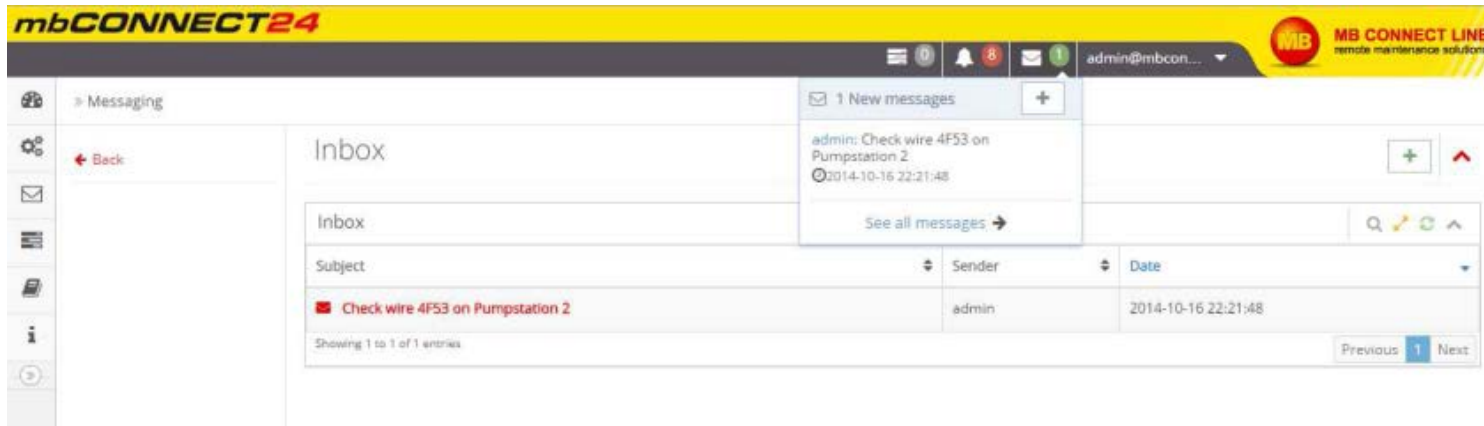

Home screen

The screenshot displays the mbCONNECT24 V2.0 interface. The top navigation bar includes 'Dashboard', 'Administration', 'Messaging', 'Tasks', 'Reporting', and 'System'. A sidebar on the left lists various settings: Back, Express Setup, Interfaces, Services, Visualizations, Alarming, Logging, and Scripts. The main content area is titled 'Pumpstation1 - Pumpstation in Area 1'. It features a 'Device Information - MDH860' section with fields for Name, Description, Serial, and VPI ID. Below this is a 'Device Summary' table listing system components like LAN, Internet, WAN, VPI, Serial COM1, MPI/PROFIBUS, and USB Network Access. To the right, the 'Device Location' section shows a map with a location pin and a 'Contact - MDH860' field.

- ✓ configuration of the devices and all settings will be made here
- ✓ settings for all devices linked to the router will be made here (LAN, RS, MPI/PROFIBUS)
- ✓ Set-up of specific data points for the linked components and devices will be made right here

mbCONNECT24 V2.0

Messages

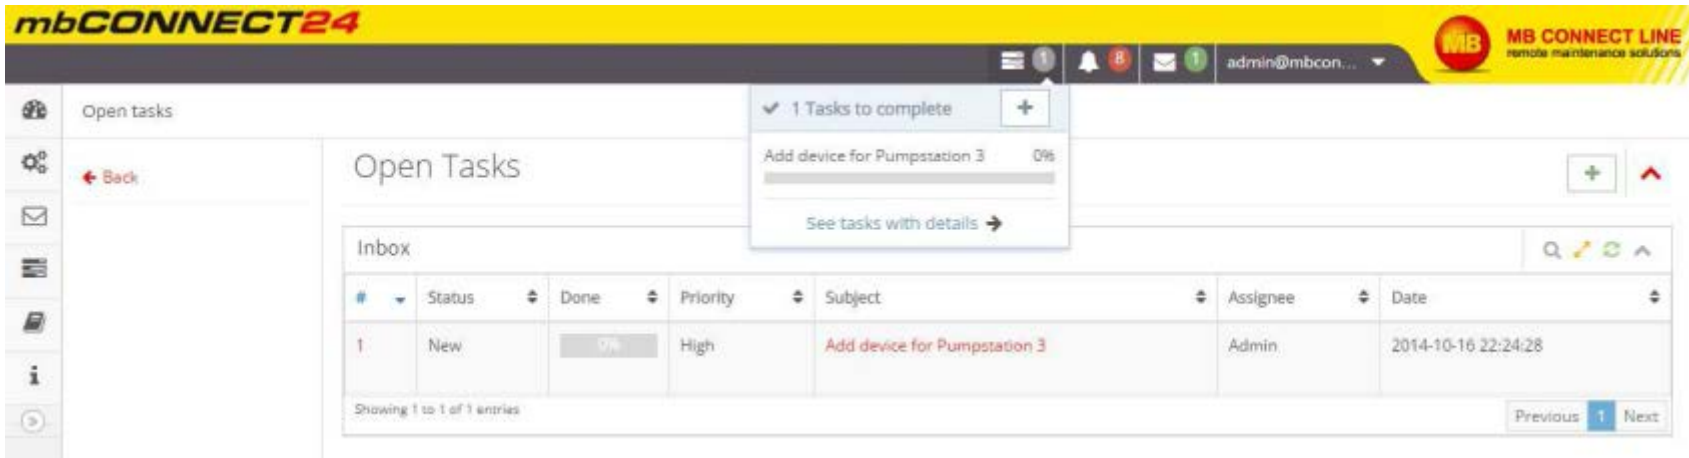

✓ Integrated Mail System

- Send messages to account users
- Create and send project based messages
- Messages could be sent from the portal owner to the portal users
- News, Updates, Maintenance downtimes and product information can be sent to all users

mbCONNECT24 V2.0

Tasks

The screenshot displays the 'Open Tasks' section of the mbCONNECT24 V2.0 interface. A task titled 'Add device for Pumpstation 3' is shown with a progress bar at 0%. A dropdown menu is open, indicating '1 Tasks to complete' and 'Add device for Pumpstation 3 0%'. The task is listed in an 'Inbox' table with columns for #, Status, Done, Priority, Subject, Assignee, and Date.

#	Status	Done	Priority	Subject	Assignee	Date
1	New	0%	High	Add device for Pumpstation 3	Admin	2014-10-16 22:24:28

✓ Integrated Task Management System

- Define and create tasks for account users
- Create project based tasks

mbNET.mini

mbNET.mini

- **Integrated Ethernet Switch (3-port LAN with WAN, 4-port LAN with Cellular)**
- **3G version supports GPRS, EDGE, UMTS and HSPA+**
- **2 Digital inputs for connection to the remote service platform or for sending alerts via text message or e-mail**
- **OpenVPN security protocol**
- **Ideal for M2M applications**
- **Solid metal case for DIN rail mounting**
- **Does not include the Toolbox**

mbNET Industrial Router

mbNET Industrial Router

- **Enables a secure and reliable connection of machines and equipment over the internet**
- **Integrated firewall ensures maximum access protection by allowing remote access only to identified and authenticated users.**
- **Full feature support, including the Toolbox**
- **Full feature industrial router support NAT tables and IP routing tables**
- **Many different configurations available to suit any connection needs**

mbNET Industrial Router

- **Integrated 4-port Switch (4x Ethernet 100 Mbit)**
- **Secure connection via VPN (PPTP, IPsec, OpenVPN, L2TP)**
- **2x RS-232/485 interface selectable onboard**
- **Optional MPI/Profibus**
- **2 SIM card slots with failover functionality**
- **4 Digital inputs, 2 digital outputs**
- **Network connection can be initiated from anywhere via SMS control function**
- **Slim Metal case with DIN rail mounting**

mbNET Industrial router I/O-manager

- Access to values of S7 PLCs
- Logging on USB-stick (interval adjustable)
- RFC 1006 via ethernet or MPI/PROFIBUS
- Maximum 4 connections to PLCs
- Each connection supports a maximum of 256 values

The screenshot displays the 'Tag Status' interface. At the top left is a refresh icon. Below it, the title 'Tag Status' is shown in red. A 'Status' bar contains a 'Stop Refreshing' button. The main content area is titled 'SPS1' and contains a table with the following data:

Number	Description	Address	Value	Timestamp	Validvalue
0	Taktmerker	MB0	00000000	2012.05.06,19:35:08.188	1
1	Temperatur	MD4	0.000000	2012.05.06,19:35:08.188	1
2	Zeit	T1	0.000000	2012.05.06,19:35:08.188	1
3	Zähler1	Z1	0	2012.05.06,19:35:08.188	1
4	Test	MW10	0	2012.05.06,19:35:08.188	1
5	Test2	DB1.DBW8	0	2012.05.06,19:35:08.188	1

mbSpider

- **FTP server/client functionality**
- **Web Visualization**
- **Internal programming allows you to collect, evaluate and visualize any data.**
- **Send messages via SMS and e-mail**
- **1 Ethernet Port usable as LAN/WAN**
- **Communications via TCP/IP, ModbusTCP and S7 ISOTCP**
- **1 RS-232-/485 interface**
- **2 digital and 4 analog inputs, 1 relay output**

mbSpider

- Available with 3G cellular modem
- Secure outbound connection to mbCONNECT24 Portal
- Perfect for data collection and web visualization with fully customizable interface
- Available in Slim metal and full plastic cases

mbSECBOX- PLC backup and virus detection

mbSECBOX

- **Permanent backup of dynamic PLC-data**
- **Manipulation detection to thwart hacking attempts**
- **SMS or e-mail if something changed in static memory**
- **Easy restore of saved data without software of the distributor**
- **No data loss when replacing PLC's**
- **Convenient operation via integrated web interface or simply via device I/O**

Global SIM

- **With a prepaid global SIM make your machine accessible anywhere in the world, anytime**
- **Full GSM support for global carrier access**
- **Simple administration of SIM cards via “MyM2M” portal**
- **Clear prepaid rate model**
- **No minimum contract period**

Benefits provided from the MB Connect Line remote maintenance systems

mbNET®

mbCONNECT24

mymbCONNECT24

- Perfectly matched components
- Modular solutions, all from one source
- Fast response time
- Fits into every infrastructure
- Easy connection handling
- No unauthorized entry
- Grows with the plant
- Maximum security
- Continuous transparency
